This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-9 (Canceled)

10. (Previously presented) A method for recording ingestible products consumed comprising:

providing a template on at least one of a periphery of a package and a container containing an ingestible product; the template comprising a recordable surface and an entry field for recording information about the ingestible product;

recording at least one of quantity of ingestible product consumed and a time a quantity of ingestible product was consumed on the template; and

recording a quantity of ingestible product consumed by each of two or more different individuals.

11. (Previously presented) The method for recording ingestible products consumed of claim 10, wherein the quantity ingested and the time the quantity was ingested are both recorded on the template.

12. (Canceled)

13. (Previously presented) The method for recording ingestible products consumed of claim 10, wherein the template comprises one or more pre-formatted fields.

14. (Previously presented) The method for recording ingestible products consumed of claim 10, wherein the template comprises adhesive for affixing on the at least one of a periphery of a package and a container containing an ingestible product.

15. (Previously presented) The method for recording ingestible products consumed of claim 10, wherein the template comprises either an adhesive backed note pad or a note pad comprising tear lines.

16. (Previously presented) The method for recording ingestible products consumed of claim 10, wherein the template comprises part of a surface of the periphery of the package or the container.

17. (Previously presented) The method for recording ingestible products consumed of claim 10, further comprising an identifier.

Claims 18-26. (Canceled)

27. (Withdrawn) The template of claim 32, further comprising a writing instrument positioned adjacent the template.

28. (Withdrawn) The template of claim 32, further comprising a pocket, wherein the template is positioned inside a receiving space of the pocket.

29. (Withdrawn) The template of claim 32, further comprising a security shrink wrap wrapped over the template.

30. (Previously presented) A template for recording information about an ingestible product comprising:

a recordable medium comprising:

a plurality of sides;

a plurality of lines printed on the medium, the plurality of lines defining a plurality of entry fields for entry of information about the ingestible product, and a pre-formatted field comprising at least one printed word, said at least one printed word conveying information for recording a time representing a future event.

31. (Previously presented) The template of claim 30, further comprising a first name entry associated with the at least one printed word and a second name entry in combination with a time entry, said time entry indicative of a future event.

32. (Previously presented) A template for recording consumed medication dosages comprising:

a recordable medium for recording information about the consumed medication comprising a plurality of sides,

adhesive for applying the recordable medium to a surface,

a plurality of lines printed on the recordable medium defining a plurality of entry fields for recording information, and a first printed time indicia indicating a first time a first dosage of medication was consumed and a second printed time indicia indicating approximately a second time a second dosage of medication is to be consumed, which defines a time interval between the first dosage and the second dosage, and wherein the time interval is based on a recommended range for a particular age group.

33. (Previously presented) The template of claim 32, wherein the plurality of entry fields are arranged in one or more columns.

34. (Previously presented) The template of claim 32, wherein the recordable medium is an integral part of a label on a medication container.

35. (Previously presented) The template of claim 32, wherein the template is an add-on feature of a medication container.

36. (Previously presented) The template of claim 35, wherein the add-on feature is a note-pad.

37. (Previously presented) The template of claim 35, wherein the add-on feature is a note pad with a peelable sheet.

38. (Previously presented) The template of claim 32, further comprising one or more pre-formatted fields on the recordable medium including at least one pre-formatted field related to volume.

39. (Previously presented) The template of claim 32, wherein the plurality of lines include two or more parallel lines.

40. (Previously presented) The template of claim 32, wherein the recordable medium is part of a periphery of a container.

41. (Previously presented) A template for recording an ingestible product consumed comprising:

a recordable surface and a plurality of entry fields for recording information related to the ingestible product,

a first entry field comprising a first name entry;

a second entry field comprising a first time entry;

a third entry field comprising a second time entry; and

wherein the first time entry and the second time entry define a time interval for consuming two distinct dosages; and wherein the second time entry represents an approximate time of a future event.

42. (Previously presented) The template of claim 41, wherein the template is part of an adhesive backed note pad.

43. (Previously presented) The template of claim 41, wherein the template is an integral part of a medication package.

44. (Previously presented) The template of claim 41, wherein the template is an add-on feature on a medication package.
